### Choose your way to save with a 3-month supply

You have a choice of how to get your long-term medications – either through home delivery from Express Scripts® Pharmacy or at a participating CVS retail pharmacy.

- CVS has more than 9,800 convenient locations available, and many are open 24/7
- You can transfer your prescription easily in store, by phone, online or via the CVS mobile app
- Auto refills and refill reminders are available.

### Home delivery: savings and to-your-door convenience

Did you know you could avoid paying more money if you use home delivery? For your long-term medications (those you take for at least 3 months), you'll typically pay less with home delivery from Express Scripts® Pharmacy. You'll get up to a 3-month supply with **free** standard shipping.

**It's easy to start!** Just call us at the number on your member ID card, and we'll ask your doctor for a new prescription. Or ask your doctor to e-prescribe or fax a 3-month prescription to us. You can also get started at **express-scripts.com**.

### Generics: benefits for your health and budget

FDA-approved generics are just as safe and effective as brand-name medications. The difference? Generics can cost up to 85% less,<sup>1</sup> and 9 out of 10 prescriptions filled are generics.<sup>2</sup>

If you're taking a brand-name medication, ask your doctor if a less expensive generic is available.

If you purchase a brand-name drug when a generic equivalent is available, you will pay the applicable coinsurance plus the difference in cost between the brand-name drug and the generic drug. Sign in at [express-scripts.com](https://www.express-scripts.com) for more information.

Your plan has an out-of-pocket maximum of \$3,600.00 for you or \$7,200.00 for your family.
